

Preliminary qualitative comparison: RGB + Description

HSI-derived RGB

NEON\_D01\_BART\_DP3\_312000\_4875...

Qwen3-VL-8B

Q: What is the dominant vegetation type in the scene?

A: Dense, moist forest canopy.

InternVL3-8B

Q: What is the dominant color of the vegetation in the image?

A: Dark green

Gemma-4-12B

Q: What is the primary vegetation type covering most of the scene?

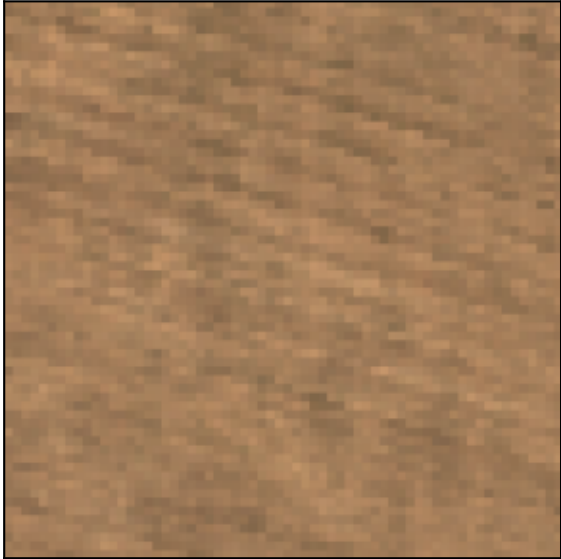

A: Dense woody vegetation canopy.

Mistral Small 3.1 24B

Q: What percentage of the scene is covered by darker, denser canopy?

A: 75%

HSI-derived RGB

NEON\_D06\_KONZ\_DP3\_708000\_4336...

Qwen3-VL-8B

Q: What is the dominant surface material across the entire scene?

A: Dry, yellowish-brown soil mixed with dried herbaceous residue.

InternVL3-8B

Q: What is the dominant color of the agricultural field in the image?

A: The dominant color is a rough, yellowish-brown.

Gemma-4-12B

Q: What is the primary composition of the field surface shown in the image?

A: A mixture of dry herbaceous residue and light soil.

Mistral Small 3.1 24B

Q: What is the primary color of the field in the image?

A: The primary color of the field is a rough, boundary-less light brown.
