

Preliminary qualitative comparison: Description Only (RGB shown only as a reference)

HSI-derived RGB

NEON_D01_BART_DP3_312000_4875...

Qwen3-VL-8B

Q: What is the dominant vegetation type in the scene?

A: Dense, moist forest canopy

InternVL3-8B

Q: What is the dominant color of the vegetation in the image?

A: Dark green

Gemma-4-12B

Q: What is the dominant vegetation type covering most of the scene?

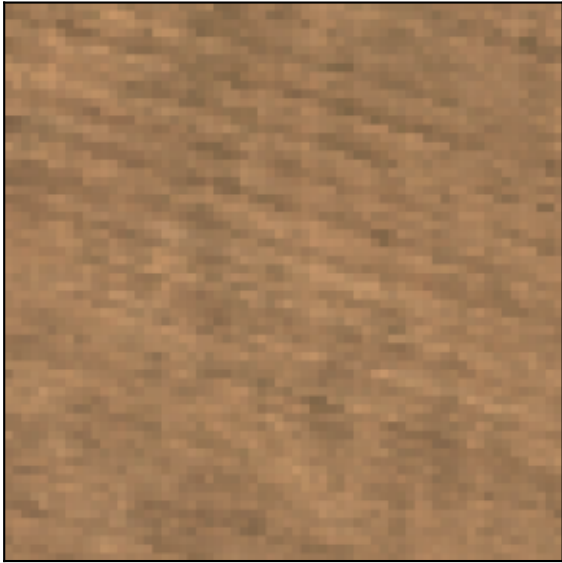

A: Dense woody vegetation canopy.

Mistral Small 3.1 24B

Q: What proportion of the scene is covered by the denser, more shaded canopy?

A: approximately three-quarters

HSI-derived RGB

NEON_D06_KONZ_DP3_708000_4336...

Qwen3-VL-8B

Q: What is the dominant surface material across the scene?

A: Dry, yellowish-brown vegetation residue mixed with exposed soil.

InternVL3-8B

Q: What is the dominant color of the farmland in the image?

A: The dominant color is a rough, yellowish-brown.

Gemma-4-12B

Q: What is the primary composition of the field surface shown in the scene?

A: A mixture of dry herbaceous residue and light soil.

Mistral Small 3.1 24B

Q: What is the dominant color of the field?

A: Rough brown
